Other Use

Water use is for fish propagation of an endangered Wenatchee River Steelhead. This acclimation pond is uniquely located where Washington Department of Fish and Wildlife directly river plants 50,000 steelhead into the Wenatchee River annually. Prior years of direct river planting of steelhead have resulted in 70% or more of the fish straying to other river systems. Holding steelhead in this acclimation pond with Wenatchee River water flowing through, will improve the homing fidelity and increase the recovery of an Endanged Species. Icicle Chapter of Trout Unlimited has received Chelan County PUD, Federal, Tribal and State support for this project. A seconday use of the pond will be as a Juvenile fishing facility. In partnership with the City of Leavenworth, Washington Department of Fish and others; Icicle Chapter of Trout Unlimited will plant fish in the pond for this purpose after the steelhead have migrated. Icicle Chapter of Trout Unlimited has very strong City and community support because of the lack of fishing opportunities for youth in this area. This pond would provide a fishing opportunity for youth in the immediate Leavenworth downtown core.

Are you proposing to store more than 10 acre-feet of water? ☐ YES ☒ NO

If you answered yes to any of the above questions, please describe: Previous years the pond was deepened to 20 feet and is about one third of an acre in size.

NOTE: If you will be storing 10 acre-feet or more of water and/or if the water depth will be 10 feet or more at the deepest point and some portion of the storage will be above grade, you must also complete an Application for Permit to Construct a Reservoir and a Dam Construction Permit and Application.
